

Beautiful Disaster

Self Deception

Can you see it from a distance?
Welcome to the pale blue dot
Mote of dust in a ray of light

Wake the dreamer, angry leader
Plant your landmines on the moon
Is your god there to comfort you?

To the end of time, this is you and I
And we are just a beautiful disaster
To the day we die, every low and high
Yeah we are just a beautiful disaster

Every mother, every privilege
Every pleasure and suffering
Every martyr who dies for nothing

Holy prophets, war is constant
Fuck the world but we save the earth
We're everyone, everything ever done

To the end of time, this is you and I
And we are just a beautiful disaster
To the day we die, every low and high
Yeah we are just a beautiful disaster

Everyone, everything ever done
Everyone, everything ever done
Everyone, everything ever done
Everyone, everything ever done
Everyone, everything ever done
Everyone, everything ever done

To the end of time, this is you and I
And we are just a beautiful disaster
To the day we die, every low and high
Yeah we are just a beautiful disaster
