

## If Not Now, It's Soon

Self Esteem

Everything you are, everything you see  
Everyone got used to who you pretend to be  
What if you're not scared, what if you're just here?  
Another page is turned now, won't you stand on to see clearly now?

Only not too far, it all comes around  
You wonder who it was who made the choices in that town  
'Cause that was just still you, you're the sum of all these parts  
And we can work together to become who's in your heart, I know

If not now, it's soon  
And whatever is right for you  
Will guide you through  
Take it back to the beginning  
If we still get on that feeling  
Take it back to the beginning  
If we still get on that feeling

Something will happen, because it's got to  
It's not just perseverance we need, it's patience

And with all of life's complexities  
How can one way become what we deem and believe  
To be right to be true  
Hold on

'Cause if not now, it's soon  
And whatever is right for you  
Will guide you through  
Take it back to the beginning  
If we still get on that feeling  
When you just wanted to sing  
You didn't know what that would bring

'Cause if not now, it's soon  
Whatever is right for you  
Will guide you through
