

Summersound

Self

Maybe we should take a long vacation
Only to a place you've seen in your imagination
A place where time stands as still as the Earth
Racing beneath the stars

Hello sunshine, we're waking up
People gather 'round for the summersound
Farewell moonlight, we've had enough
Watch your sorrows drown in the summersound

Now you've got a mind aliens could hang with
You can always talk to me in any language
Utter a sound, and I'll be around
Above and beyond this life

Hello sunshine, we're waking up
People gather 'round for the summersound
Farewell moonlight, we've had enough
Watch your sorrows drown in the summersound

You've been a bird, and I've been a plane
You've been real cool, and I've been insane
But somehow it makes sense when I'm with you
