Beautiful Sky

Semisonic

Let's raise a toast to the ones we love most
Take time to dance with the ghosts
Right down the hatch while we're waving the past out the door

Let's stay together, we'll all live forever
If wishing it could make it so
You're where you belong, you've been out there too long in the cold

It's a beautiful sky
At times I thought it would fall
Just to be here alive
Just to let that be all
Let's make this one last

Well I fought and I cried just to stay satisfied
And prayed that we all might survive
So why do I feel like I'm still at the end of the line?

Can it just be enough just to live, just to love?
And know that I'm here by your side
Reframing my mind, try to be satisfied with this time

It's a beautiful sky
At times I thought it would fall
Just to be here alive
Just to let that be all

It's a beautiful sky
At times I thought it would fall
Just to be here alive
And to let that be all
Let's make this one last
Let's make this one last

Let's make this one last
Let's make this one last
Let's make this one last
Let's make this one last

If you wanna feel loved, you gotta be love
If you wanna be loved, you gotta feel love
If you wanna feel loved, you gotta be love
If you wanna be loved, you gotta feel love
