

Keep Me In Motion

Semisonic

Saw my face on the nightclub ceiling
Saw my feet on the painted floor
Genevieve I can't shake the feeling
I don't know how to shake no more

Out in the crowd
On my very own cloud

Standing back in the shadows waiting
Look around for the only one
Turn the tables cos my hopes are fading
You always knew how to start me up

Out of the dark
Sky full of stars
Right where you are
Just need a spark

Keep me in motion
Don't let me go
Keep me in motion
Whoah, whoah, whoah

All the ways that you found to show me
Where to find a ray of light
You know me like nobody knows me
Genevieve, I need you tonight

Mirrors above
The toughest of love
More than enough
Just give me a shove

Keep me in motion
Don't let me go
Keep me in motion
Whoah, whoah, whoah, whoah

You be the moon and I'll be the rising ocean
You be the sun and I'll be the world in motion
Don't let me go
Don't let me go
Don't let me go
Don't let me go

Keep me in motion
Don't let me go
Keep me in motion
Go, go, go, go

You be the moon and I'll be the rising ocean
You be the sun and I'll be the world in motion
Don't let me go
Don't let me go
