

# Lightning

Semisonic

I was down in the dark  
With my friends on the sidelines  
Watching you radiate

I could hardly believe  
When you came down to find me  
That's when everything changed

But those moments don't last  
The brightest come and go in a flash

Am I asking for too much for lightning to strike me  
Strike me a second time  
Am I pushing my good luck to wish that you'll call me  
Call me a second time

You've got glitter and grace  
Everything that I don't have  
I wish I was like you

Even when you're away  
No one else on my radar  
You're all I want to do

It was magical then  
So why can't we have magic again?

Am I asking for too much for lightning to strike me  
Strike me a second time  
Am I pushing my good luck to wish that you'll call me  
Call me a second time  
(Lightning to strike me)  
(Strike me a second time)

Am I asking for too much for lightning to strike me  
Strike me a second time  
Am I pushing my good luck to wish that you'll call me  
Call me a second time  
Lightning to strike me  
Strike me a second time
