

Laser Beams

September

Laser beams of love in my heart
That's what you send each time we part
Laser beams of love that I keep
Until the next time that we will meet

You got the power you need
So strong that I never can be free
I don't ever want it to stop
You know I just can't get enough

Is it magic the way you touch my heart?
What's your weapon that opened up my guard?
Science fiction or just a natural thing
You are everything

Laser beams of love in my heart
That's what you send each time we part
Laser beams of love that I keep
Until the next time that we will meet
Laser beams of love, it was you
Who shot me down with love so true
Laser beams of love, make me feel
I'm in love from my head to my feet

The day we happened to meet
A strange thing just appeared to me
It was the answer to my prayer
Your love had finally found it's way

You're special and not like the boy next door
So special and just what I waited for
I'm a victim for love of first degree
Till' eternity

Laser beams of love in my heart
That's what you send each time we part
Laser beams of love that I keep
Until the next time that we will meet
Laser beams of love, it was you
Who shot me down with love so true
Laser beams of love, make me feel
I'm in love from my head to my feet

I want you, I need you
I got to be so near you
Together forever
That's what we'll be

Laser beams of love in my heart
That's what you send each time we part
Laser beams of love that I keep
Until the next time that we will meet
Laser beams of love, it was you
Who shot me down with love so true
Laser beams of love, make me feel
I'm in love from my head to my feet
