

You're all just graveseeekers  
Destined for the earth  
You're all just graveseeekers  
Forever lost beneath the ground  
Watching closely as the planet crumbles  
And the fears of man take form  
And everything around the world gives torment  
And everything around offers escape  
When they jump they never hit the ground  
When they pull the trigger bullets won't come out  
Every day for months they're seeking death  
From the pain left by their doubt  
When signs were given and warnings made  
Your ears stayed shut  
When nightmares came and tortured you, you wouldn't shut up  
Now as then until the end you'll feel the pain of loss again  
You made the wrong decision  
Pain, loss, and anguish summoned from the deep abyss  
You'll never feel love again  
Not that you chose it back then

Fear, hate, regret consumes you until the end of days  
Flee for your life  
Now that you've dug your own grave  
When they jump they never hit the ground  
When they pull the trigger bullets won't come out  
Every day for months they're seeking death  
From the pain left by their doubt  
YEAH!

When they jump they never hit the ground  
When they pull the trigger bullets won't come out  
Every day for months they're seeking death  
From the pain left by their doubt  
When they hold their breath they're never drowned  
When they cut their wrists the blood just won't come out  
Every day for months they're seeking death  
From the pain left by their doubt  
You're all just graveseeekers  
Destined for the earth  
You're all just graveseeekers  
Forever lost beneath the ground
