

# Electric Love

Serena Ryder

Don't want you in my dreams  
Don't want to fall asleep  
Don't want to miss anything  
That you're gonna do to me  
It's like a laser beam  
When it's just you and me  
And all our thoughts  
They turn into energy

I know your shock is true  
It's such a trip  
You're plugging into me  
High voltage chemistry

Our love's electric and now they're  
So close to water that we'll never know  
If there's a chance of surviving  
If there's a chance, baby, we're gonna blow  
Our love's electric, electric

You're in the heart of me  
Every part of me  
You've got the everything  
I ever wanted it to be  
It's perfect synergy  
When it's just you and me  
And when we touch  
It turns into electricity

I know your shock is true  
It's such a trip  
You're plugging into me  
High voltage chemistry

Our love's electric and now they're  
So close to water that we'll never know  
If there's a chance of surviving  
If there's a chance, baby, we're gonna blow  
Our love's electric, electric

You and me, we are electric soldiers  
With the power of lightning in our eyes  
Don't believe a single word they told ya  
When they said that we would never last  
We'll always survive

Our love's electric and now they're  
So close to water that we'll never know  
If there's a chance of surviving  
If there's a chance, baby, we're gonna blow  
Our love's electric and now they're  
So close to water that we'll never know  
If there's a chance of surviving  
If there's a chance, baby, we're gonna blow  
Our love's electric, electric
