Famous

Serena Ryder

Let's take a shot at glory and gold
I just want to build you something of our own
Do you want the roar, the scream of the crowd
Or could my voice be enough for you now

Cause every mountain that I climb is all for you
And every fire that I light is all for you
Could you be happy by my side if we never get famous
If we never get famous, if we never get high

You never had the best things in life
I just want to spoil you and treat you real nice
I don't need the heights, red carpets and lights
It's enough if you're mine, if you just stay the night

Cause every mountain that I climb is all for you
And every fire that I light is all for you
Could you be happy by my side if we never get famous
If we never get famous, if we never get high

Baby it's alright to dream of more
To shine on a light
But if it's not right
Will we be fine, just you and I

Cause every mountain that I climb is all for you
And every fire that I light is all for you
But will your heart be satisfied if we never get famous
If we never get famous, if we never get high

And every mountain that I climb is all for you
And every fire that I light is all for you
Could you be happy by my side if we never get famous
If we ever get famous, if we ever get high

And every mountain that I climb is all for you
And every fire that I light is all for you
And if we ever get it right promise me it won't change us
If we ever get famous, if we ever get high
