

## Sail

## Serenity

A night, one of a kind  
No use in break of day, alone  
The wind is blowing stronger,  
whispers softly in my ear, your name  
And the water in my eyes is just the rain  
You must go, you must go!

There's a place out, on the ocean  
far away from love's commotion  
We could sail, we could sail  
There's no wave to break the silence  
Only driftwood left of violence  
We could sail, we could sail  
We could

Are we on the right way  
or should I alter course, alone  
Is the anchor down the deep  
Really stronger than our force  
Don't you see I'm loosing ground  
Hold on tight and don't let go  
Just for this moment, far away

Just follow me and take my hand  
I'll follow you, I promise you

There's a place I'm sure, sail away with you  
far away, sail away, far beyond  
Set sail to far beyond, rising like the sun  
No reason to stay
