

# Breaking Away

Sergey Lazarev (Сергей Лазарев)

Another moment that I stopped to say you're beautiful  
So hold your breath, we're gonna rise up to the sky  
Another minute till we're counting time so wonderful  
And disappear beyond the clouds into the night

I will take you higher, where stars are shining brighter  
If you're scared then don't look down  
Rebel, you can be a rebel  
Calling like an angel, see the world go round

Breaking away  
We're getting stronger every day  
Now that I know that we could never say goodbye  
So now we spread our wings, we're flying high  
Breaking away  
We're getting stronger every day  
We're running wild into the night  
No turning back, we gotta hold on, hold on tight  
This time we're gonna break away  
We're gonna break away

Another second till you're standing right in front of me  
Together we can make it high off the ground  
Another reason to be flying to eternity  
Don't say a word, don't say a word, don't make a sound

I will take you higher, where stars are shining brighter  
If you're scared then don't look down  
Rebel, you can be a rebel  
Calling like an angel, see the world go round

Breaking away  
We're getting stronger every day  
Now that I know that we could never say goodbye  
So now we spread our wings, we're flying high  
Breaking away  
We're getting stronger every day  
We're running wild into the night  
No turning back, we gotta hold on, hold on tight  
This time we're gonna break away...

We're gonna break away  
Hold on tight, hold on tight, hold on tight...

Breaking away  
We're getting stronger every day  
Now that I know that we could never say goodbye  
So now we spread our wings, we're flying high  
Breaking away  
We're getting stronger every day  
We're running wild into the night  
No turning back, we gotta hold on, hold on tight  
This time we're gonna break away...
