

# State Of My Despair

Serious Black

Trade on your life inside  
Buy everlasting lies  
Find all you need tonight  
Then hide inside that electric sky  
(We want, we want, we want, we want)  
Time enough to circle 'round the sun  
(We need, we need, we need, we need)  
Light enough to realize it's gone  
(You'll find, you'll find, you'll find, you'll find)  
When you find there's nothing left to buy  
You stand aside, watch life pass by

I realize there's  
Nothing can't be done  
But time that's lost  
Won't ever come back round  
In this moment  
I reflect a lifetime shown me  
Now I know  
The state of my despair

Now I know I'm not afraid to show  
I'm breaking down inside  
The cracks appear so clearly now  
The framework of my life  
Comes crashing down tonight  
It's time you know  
The state of my despair

Give up on your dreams and call it love  
Well, all I see's a world that's come undone  
Before too long there's nothing left inside  
You stand aside, watch life pass by

I realize there's  
Nothing can't be done  
But time that's lost  
Won't ever come back round  
In this moment  
I reflect a lifetime shown me  
Now I know  
The state of my despair

Now I know I'm not afraid to show  
I'm breaking down inside  
The cracks appear so clearly now  
The framework of my life  
Comes crashing down tonight  
It's time you know  
The state of my despair

Despair under the sun  
Is everything I've got  
I have to change my ways  
Now I know what I've become  
I see what I have done  
My life was passing by

I realize there's  
Nothing can be done  
'Cause time that's lost  
Won't ever come back round

I'm not the only one  
To find myself all  
Broken up inside  
The whole world is falling and now  
The framework of your life  
Comes crashing down  
And now I know you know  
The state of my despair
