

Old Glory

Seth Anthony

Started this morning when I poured myself a drink
Then I headed to the bar cuz the whiskey kills the pain
I tried to drink the bottle but the bottle drank me
Last text I got is baby get home safe
I stumbled through the door it's a quarter past four
Couldn't make it to the bed so I slept on the floor
I told her last time baby was the last time
But I had a shitty week I'm trying to ease my mind

Where I come from you work until it's done, and then you
You crack a cold beer because you been up before the sun
Sometimes it's a hard to be a man
When times get tough you always gotta have a plan
Well it's tough right now, gas prices to the sky
So many people lost and only god knows why
We fly the flag high it ain't never coming down
If you don't like this country get the hell from round

Here we live to be free, we fight for what we love and that's t
he old glory
The only thing I'm burning is these dirty ass logs
What happened to the pride and love for soldiers that we lost
American made tat it on my grave
Open your eyes this country needs to be saved
It's the stars and stripes, it's the red white and blue
You better stand up for your rights before they're taken from y
ou

Grand Daddy would be rolling in his grave
If he knew about these times and these dirty dark days
The TVs telling us that there's only one way
I'm tired of the shit I got something to say
Hank said it best, a country boy survives
Now they wanna take our guns well they can go ahead and try
They brainwashing people I ain't falling for the lies
Now they say our flag is racist y'all went and lost your mind

Here We live to be free, we fight for what we love and that's t
he old glory
The only thing I'm burning is these dirty ass logs
What happened to the pride and love for soldiers that we lost
American made tatted on my grave
Open your eyes this country needs to be saved
It's the stars and stripes, it's the red white and blue
You better stand up for your right before they're taken from yo
u
