

Zero

Seth Sentry

Super Cool
Ayy

Code name: Zero, fuck an old name
I could freeze a flow into a blade, catch a cold case, yeah
Cuts cool like a snow day
Zero got a bunch of red flags, fuckin' ole
You already know
Yeah, I was zero to a thousand
Now, the number feeling low, yeah
You got zero problems now, you got zero in the vault

My birthstone's probably rock bottom, well, Geronimo
Dropped outta school, now, I'm honour roll
I got a heart of gold 'cause it's hard and cold
Jump you then I'm flipping through your money, that's a sum assault
This whole leaderboard getting meteored
They don't talk to me, and I just really hate to be ignored
Sick of tryna DM other rappers through a Ouija boards
Tryna beat a horse back to life so I can beat it more
'Cause every single day, a soon-to-be divorced rapper
Has to go and sweep the floors at a beach resort and clean up
A bunch of pina coladas and penis straws, and put his dream on pause
And it's sad (Aw) 'cause I just wanna be the leading cause (Yeah!)
Not a trendsetter, I'm the best ever
Vendetta, waking up pissed like a bed wetter
I just went for my tenth check-up at the med centre (Uh-huh)
Still so sick but, every day, I seem to get better

Okay, sleeping on the name, get the whole thing
Crocheted on a lil' cushion for your own wake
Don't wait, carve it on the table like it's no fate
Don't blink, catch an umbrella when I throw shade
Wait a sec, what day is it? I may have slept
I'm serious, what year is it? Don't lay in bed
I would love a day of sex, but baby, there ain't a deus ex
I don't really stress about the future, I ain't made it yet
Or break a sweat
'Cause I am so well acquainted with staring down the barrel of the gun, I ain't afraid of it, yeah
I have had it pointed at my head so much that I just started shaving with the bayonet
Oh yeah, there's danger in the safe, I am the greatest yet
See me disappear without a trace again
You can try to train a hound to chase him down
But I won't leave the faintest smell
'Cause I still move like I ain't ever made a scent, Zero
