

That Other Girl

Sevdaliza

He never knew what I was made of
Heat couldn't melt me, cold couldn't waver me
He never knew my form or shape
His heart couldn't melt me, water couldn't bathe me

Caught in Camden with a stare
He took me all the way in despair
Operating from another world
I want to be that other girl
That other girl
Want to be that other girl
I want to be that other girl

He never knew what I was made of
Heat couldn't melt me, cold couldn't waver me
He never knew my form or shape
His heart couldn't melt me, water couldn't leave me

Caught in Camden with a stare
He took me all the way in despair
Operating from another world
I want to be that other girl
That other girl
Want to be that other girl
