Sevdaliza

I'd weigh a million pounds if you were gravity  
I'd take a billion pills if they gave me sanity

Time has passed me by  
Share my great advice  
For granted, taken nice  
Weigh a pit underneath the light

The force that perfect us  
And all the affections  
As they infect us, love couldn't help us  
Ooh, you crawl underneath me

I'd die a million deaths, and you'd resurrect me  
I'd fall a billion times, but you wouldn't let me  
You wouldn't let me

The force that perfect us  
And all the affections  
As they infect us, love couldn't help us  
Where would I go?  
Where would I go?

Where would I go?  
Where would I go?  
Where would I go...?

Ooh, you crawl underneath me
