

# By the Light of the Moon

Seven Lions

No, I won't give it up  
When the shadows grab a hold, no  
When the nightfall weeps  
In violent grief  
No, I won't give it up  
One with the sun, you're gettin' cold, no  
And the inferno stars  
Crash into me

So what if the earth shatters?  
So what if the sky blackens?  
So what if the dark matter  
Pulls us in and won't let us get out together?

And all the worlds we built are endin' in collapse  
And the battle for this love is closin' in on us

Just know if they won't be undone  
In the darkness we will bloom  
And when the days forever come  
We will shine by the light of the moon
