

# Darkness

Seven Lions

I'm starting to feel like we were breaking to heal  
Like were floating on ice  
But were still holding tight

I didn't not want this  
So tell me u want this

You whisper, I scream, I can't feel anything  
Will you kiss me alive  
So I know your mine  
So you stay by my side

Don't let go  
Into the darkness I'll still wait for you  
Your blood bleeds in my heart

I've never felt like I need someone  
More then I need you  
Don't let go  
In all of the darkness I'll still wait for you

In all of the darkness I'll still wait for you  
In all of the darkness I'll still wait for you

We'll take our mistakes, throw them into the flames  
Every scare that you have  
I'll make mine just the same  
I promise I'm worth it  
And we could be perfect

Don't tell me it's done  
That it never felt right  
You are the one  
I waited for my whole life  
It's only you  
It's always been you  
Our stars are aligned

Don't let go  
Into the darkness I'll still wait for you  
Your blood bleeds in my heart

I've never felt like I need someone  
More then I need you  
Don't let go  
In all of the darkness I'll still wait for you

In all of the darkness I'll still wait for you  
In all of the darkness I'll still wait for you
