

Against the World

Sevendust

Is there something you wanna say?
Spit it out and eat the flames
Don't hold on it its breaks you up
And you and I we take the pain
It gives us what we need to live
I've seen it over and over, until the bitter end

I know its you and I against the world
I'm not gonna let you down
I know it's all worth dying for
Lets give them something else to burn

There's always something we gotta change
Stay in the light, don't run away
And I want is the perfect drug
You and I will find a way
To tear apart the things we hate
They want to start a way
I really want it all

I know its you and I against the world
I'm not gonna let you down
I know it's all worth dying for
Let's give them something else to burn
