

Come Down

Sevendust

I guess for now I'm gonna go and run away, my mind's made up
I'm not the flaw, I'm not gonna fall in the grave
Just to prove you're wrong
You know you're wrong

So come down, you must be outta your mind
Let's stay here forever, until we're older
Done with life forever

Right now I'm looking at heaven, you're not
Your spinning round,
If I die young, I'll die with some love in my heart
And my feet on the ground, my feet on the ground

So come down, you must be outta your mind
Let's stay here forever, until we're older
Done with life forever
(2x)

You know your world

So come down, you must be outta your mind
Let's stay here forever, until we're older
Done with life forever
(2x)
