

## Under It All

Sevendust

And I can follow footsteps  
Can drive far enough to see the light of day  
Blame yourself for all the silence  
For all the guilty ones I've seen escape  
I so much fun this time around

I can feel the life into you  
I've been molesting yo mind  
So tell me what I should do  
My God, you know that I'm gone  
Until we are at the trail  
I just keep seeing us running under it all  
Under it all

So open up your eyes, nobody else can see us  
The tragic hours waste in space, to appease the jury  
Somebody has to deal the chance to  
Get nowhere, for all the selfish ones that feed in our face  
I so much fun this time around

I can feel the life into you  
I've been molesting yo mind  
So tell me what I should do  
My God, you know that I'm gone  
Until we are at the trail  
I just keep seeing us running under it all  
Under it all
