The more you shine
Baby, the darker I get
To you, I'm still a minor
It's too early to say anything

The spilling highlight
I can see even when I close my eyes, you and I
You're getting higher, higher
I'm getting lower, lower

If you walk one step, I'll run two steps
Baby I'm a ready bullet is loaded
In your dreams, I revealed my existence oh
Never ever give up, just like this, go straight
Now lift your hands, time is over, it's too late
Time to burning up again

Wanna get drunk with my shadow?
Feelin' in the shadow, dreaming of the starlight
Falling to the sky, burning on the light
Jump over me na na na

Oh I'm sure you didn't know, I'm runnin' after you
You burned me up deep inside my heart
Time to burning up again

Shadow is coming closer, closer
Swallowing my tears, keep going down
I'll dig into you
I'll be the B.R.I.G.H.T
Shining in the darkness
Even more secretly
The shadow will dig into you

Give up, you can't escape this orbit
What swallows me is anxiety and misery
Yeah, it's too late to avoid it, my mind is a psycho
I swallowed you up, the shadow of darkness

Can't hide it, there's already a monster in me
The moment the light enters, awake in the dream
There's a crack on the wall between us, you're wreck
One of us must disappear for the pain to end
Rest in peace

If you walk one step, I'll run two steps
Baby I'm a ready bullet is loaded
In your dreams, I revealed my existence oh
Never ever give up, just like this, go straight
Now lift your hands, time is over, it's too late
Time to burning up again

Wanna get drunk with my shadow?
