

# Superconductor

SF9

Yeah, ooh-ooh  
Oh-oh-oh, oh-oh  
Yeah

On your mind, twenty-four hours  
About to make you mine  
You know you need nobody else  
Just gotta let me hold you, I'ma show you paradise  
Can't resist, no matter how hard we try

(Here we go, here we go, oh)  
Don't be afraid, no need to hide  
(So here we go, here we go, oh)  
Don't fight the feelings, you are  
Critical, perfect in temperature  
It's fallin' down to zero  
And you can't fake it

I see it in your eyes, eyes, eyes  
Electric, and you can't control it  
Yeah, you can't control it  
Pulse is racing, love runnin' through our veins  
Intertwined together, now I'm stuck on you

Pushin' me like superconductor  
I'm pullin' you like superconductor now (Woah-oh)  
Yeah, and I'm all about you  
You know it's true  
Feel it right now  
No reason to deny  
Why don't you get it?  
Our love is magnetic

Always makin' me curious  
Love is way too mysterious  
You got me tryna figure out  
(No escape, no way out)  
Crazy maybe but just believe  
We'll be makin' new chemistry  
'Cause you know I got what you need

I see it in your eyes, eyes, eyes  
Electric, and you can't control it  
Yeah, you can't control it  
Pulse is racing, love runnin' through our veins  
Intertwined together, now I'm stuck on you

Pushin' me like superconductor  
I'm pullin' you like superconductor now (Woah-oh)  
Yeah, and I'm all about you  
You know it's true  
Feel it right now  
No reason to deny  
Why don't you get it?  
Our love is magnetic

I'll never let you down

Want this sensation high forever  
Wondering how it feels to be loved by you  
We can take it slow  
So don't you let me go

(La-la-la-la-la) Magnetic, magnetic  
(La-la-la-la-la) We'll never forget it  
Pulse is racing, love runnin' through our veins  
Intertwined together, now we're stuck

Pushin' me like superconductor  
I'm pullin' you like superconductor now (Woah-oh)  
Yeah, and I'm all about you  
You know it's true  
Feel it right now  
No reason to deny  
Why don't you get it?  
Our love is magnetic
