

# Better

SG Lewis

I know there's something right  
Right in between us  
I see you standing there  
Want you to just trust  
You make it hard for me  
So hard not to stare  
I'm moving closer, baby  
why don't you seem to care?

All my life, thinking about all these times  
Wanted someone like you  
Hold me tight, but treat me right  
All my life, needing someone to get by  
What if I had it right from the very first time?

I want it better  
I want it better  
I want it better  
I want it better for you

I know it isn't right  
You creep into the night  
Maybe you want a friend  
Maybe not in this life  
Why is it so hard  
hard to please you  
All I wanted  
was you in the room

All my life, thinking about other guys  
Never hit me like this  
Cut me deep like a knife  
All my life, tried so hard to be alright  
What have you done to me  
Blinded, I lost my mind

I want it better  
I want it better  
I want it better  
I want it better for you

I want it better  
I want it better  
I want it better  
I want it better for you

I want it better  
I want it better  
I want it better  
I want it better for you
