

## One More

SG Lewis

I know you can't stay here forever  
I know you've got friends in the bathroom stall  
Been wanna do this since I met you  
Can we just stay here for one more song

You'll just get distracted and see someone you know  
I'll be waiting getting impatient all alone  
Go out on the balcony, light myself a smoke  
Start talking to someone that I don't even know  
They just might invite me to see another spot  
You'll be trying to find me again but I'll be gone  
We'll forget each other, the night will carry on  
But that don't have to happen  
And that's not what I want, cos

I know you can't stay here forever  
I know you've got friends in the bathroom stall  
Been wanna do this since I met you  
Can we just stay here for one more song  
If you leave now might forget you  
The memory fades when I'm way too gone  
Was hoping we'd wake up together  
Maybe just stay here for one more song  
Maybe just stay here for one more song

Now imagine that you stay and we just keep it going  
Just another couple minutes in the vibe we're on  
Then I'll come with you where you're going and we'll both take one  
Feeling rushing over both of us

So we'll go out on the balcony  
Light ourselves a smoke  
Start talking to people that we don't even know  
Maybe call a taxi, to hit another spot  
But this time you'll be with me, and yeah that's what I want, cos

I know you can't stay here forever  
I know you got friends in the bathroom stall  
Been wanna do this since I met you  
Can we just stay here for one more song  
If you leave now might forget you  
The Memory fades when I'm way too gone  
Was hoping we'd wake up together  
Maybe just stay here for one more song

I know you can't stay here forever  
Maybe just stay here for one more song
