

# Overdose

SG Lewis

It's been a while  
I know we haven't talked too much  
I think about you way too much  
But it's always been that way  
I've been dying  
To pick up where we both left off  
I noticed all we had was lost  
But I know I'll feel the same

When it's just the two of us  
It can be the best thing, ooh  
Remember it was only us  
And I would give you everything

I love it when you hold me close  
Love the way your body floats  
Feel like I can overdose on your energy  
I love it when you move in close  
Time is going fast from slow  
Feel like I could overdose when you're next to me  
I love it when you move in  
I love it when you move in

Remember the feelings that you had before  
I'm always left to wanting more  
'Cause you always move away  
What you're afraid of?  
I know that you got hurt last time  
But you should know I'm not that type  
If you believe me when I say

When it's just the two of us  
It can be the best thing, ooh  
Remember it was only us  
And I would give you everything

I love it when you hold me close  
Love the way your body floats  
Feel like I can overdose on your energy  
I love it when you move in close  
Time is going fast from slow  
Feel like I could overdose when you're next to me  
I love it when you move in close  
I love it when you move in close  
I love it when you move in close  
I love it when you move in close

When it's just the two of us  
Remember it was only us

I love it when you hold me close  
Love the way your body floats  
Feel like I can overdose on your energy  
I love it when you move in close  
Time is going fast from slow  
Feel like I could overdose when you're next to me  
I love it when you move in close

I love it when you move in close  
I love it when you move in close  
I love it when you move in close
