

Prosperity

Shaboozey

Keep holding on to your sweet green
Things ain't what they seem
Wake up from your dream
I'm rich, I know prosperity
Hey, I'm asking y'all to marry me
None of your weapons are scaring me
Can't you feel me cold at night
I know soon that you'll be here with me

Are you kidding, I know you're kidding
I don't got a penny
And still want the billions
To care for our people in need
Between you and me
All you have to do is follow your dreams
You'll be living like me, feeling like me
Love is the key and we got it
So spread it infinitely

Are you kidding, I know you're kidding
I don't got a penny
And still want the billions
To care for our people in need
Between you and me
All you have to do is follow our dreams
You'll be living and free, feeling like me
Love is the key and we got it
So spread it infinitely

Are you kidding, I know you're kidding
I don't got a penny
And still want the billions
To care for our people in need
Between you and me
All you have to do is follow your dreams
You'll be living like me, feeling like me
Love is the key and we got it
So spread it infinitely

Are you kidding, I know you're kidding
I don't got a penny
And still want the billions
To care for our people in need
Between you and me
All you have to do is follow our dreams
You'll be living and free, feeling like me
Love is the key and we got it
So spread it infinitely
