

Sticks And Stones

Shaboozey

Sticks and stones may break my bones
But this here feel like a bullet hole
Broke my heart when you said you won't
I won't look back if you let me go
Sticks and stones may break my bones
But this here feel like a bullet hole
Broke my heart when you said you won't
I won't look back if you let me go

Since you left me, I've been empty
Drinking whiskey out the bottle like it's trendy
Another late night puttin' miles on the Chevy
And I'd be lyin' if I said it don't affect me

Can someone help me? Please help me
They say a broken heart can be deadly
Don't tell me we were meant to be
This is far from a fairytale ending

Sticks and stones may break my bones
But this here feel like a bullet hole
Broke my heart when you said you won't
I won't look back if you let me go
Sticks and stones may break my bones
But this here feel like a bullet hole
Broke my heart when you said you won't
I won't look back if you let me go

Yeah, I should've listened to my dog, I should've never took you home
You said that you would hold me down and then you played me like a ho
I'm in a truck with four new Goodyears, I can swerve 'em through the snow
Don't give a fuck about the weather, pack my shit and hit the road
I hit the jackpot like casino, must be why you tryna roll
And when I pull up in that Shelby, people act like this a ghost
When you left, I came up, I did the most

Can someone help me? Please help me
They say a broken heart can be deadly
Don't tell me we were meant to be
This is far from a fairytale ending

Sticks and stones may break my bones (Break my bones)
But this here feel like a bullet hole
Broke my heart when you said you won't (Said you won't)
I won't look back if you let me go
Sticks and stones may break my bones (Break my bones)
But this here feel like a bullet hole
Broke my heart when you said you won't (Said you won't)
I won't look back if you let me go

(Sticks and stones may break my bones
But this here feel like a bullet hole
Broke my heart when you said you won't
I won't look back if you let me go)
