

# Dead and Gone

## Shadows Fall

The dream inside of me  
Is a death inside of you  
You're redemption was being different  
We last way too late  
That your laugh was always fake  
It bends until it breaks  
Illusions we've forsaken

A vision still remains  
Of a world that lost and can't be saved  
It's a chance we have to take  
Our only chances are the ones we create

Waiting for this day to come  
Thought I'd be left for dead  
But the light still shines ahead  
The whole world has come undone  
Though we will carry on  
Until your ways are dead and gone

The answers can't be seen  
And hatred's all you've had  
Living lie for the tangling  
See through all the lies  
Destroy your last disguise  
Defend to survive  
Refuse to compromise

Way to replace the pain  
And make a stake we're all the same  
Escape comprehend leave behind  
And follow it till the echo dies

Waiting for this day to come  
Thought I'd be left for dead  
But the light still shines ahead  
The whole world has come undone  
Though we will carry on  
Until your ways are dead and gone

The dream inside of me  
Is a death inside of you  
You're redemption was being different  
We last way too late  
That your laugh was always fake  
It bends until it breaks  
And mends your dream forsaken

A vision still remains  
Of a world that lost and can't be saved  
Escape comprehend leave behind  
And follow it till the echo dies

Waiting for this day to come  
Thought I'd be left for dead  
But the light still shines ahead  
The whole world has come undone

Though we will carry on  
Until your ways are dead and gone
