Divide and Conquer

Shadows Fall

They've been living
Off the salt in our tears
Thriving on our suffering
For all these years

Reprogram our conscience
Twisted thoughts infect our mind
Tear apart our senses
Leave us paralyzed and blind

Abandoned and forgotten
We're standing on our own
Unite and rise together
And we will take control

System corrupted
That is feeding on itself
You divide and conquer
We find true wealth

The children of the after thought
The ones you left behind
Your neglect has built our strength
And through it all we will survive

Abandoned and forgotten
We're standing on our own
Unite and rise together
And we will take control

No more compromises
Shatter our faith and trust
You've taken everything
It never seems to be enough

You've taken everything...
Lost, lost
Generation left for dead
Faith, faith
No more faith, no more trust
Lies, lies
Defy everything you said
Die, die
And through it all we will survive

Abandoned and forgotten
We're standing on our own
Unite and rise together
And we will take control

No more compromises
Shatter our faith and trust
You've taken everything
It never seems to be enough

No more compromise
Through it all

We will survive
