When the sun shine brings a new day And your rainbow starts to appear Let us take you far far away from here

Girl rest your eyes, I'll watch you
Don't worry none, I'll keep you safe
Keep you safe, safe, keep you safe
And every waking moment
I'll pray the sun adorns your face, your face

In the stormy days of life, I'll be the light, so hold on To guide you through the night, just be patient Can we spend our nights alone with thoughts of paradise only To be with you my love, forever

During the storm, during the storm

Don't let the rain drops fall upon your face

During the storm, during the storm

Don't let the rain drops fall upon your face

As things go by, I'll stay by your side Your love I need, it cannot be denied, no no Through the years, untested waters Girl just come with me to another place

In the stormy days of life, I'll be the light, so hold on To guide you through the night, just be patient Can we spend our nights alone with thoughts of paradise only To be with you my love, forever

During the storm, during the storm, during the storm (Don't let the rain drops fall upon your face)
During the storm, during the storm
During the storm, during the storm
(Don't let the rain drops fall upon your face)

During the storm, during the storm During the storm, during the storm Don't let the rain drops
