

Let's Get Together

Shakatak

Just take the time to find out who
It is you you're talking to
Think about the damage
You've already done
Consider all the things
We said that we would never do
And looking back
You'll see the distance we have come
Glad that it's over
That's what you say
I never saw it quite that way

Let's get together now
Forget the when or why or how
Let's get together now
And live again that shining hour

Take back the bitter words
You always use to criticize
When you feel
That everything is going wrong
Could be that I misunderstand
The message in your eyes
I guess that
Nothing ever lasts for very long
Glad that it's over
That's what you say
I never saw it quite that way

Let's get together now
Forget the when or why or how
Let's get together now
And live again that shining hour
