

# Rocker

Shalamar

Are you ready to have a good time  
To the true universal beat?  
You may not come here for the fashion  
We'll be taking you to the street  
Where you won't need an invitation  
There'll be no one to keep you out  
People won't need the information  
Cos we know it's all about  
To begin a new transformation  
For the new life to be as one  
It's a powerful constitution  
That will last through our time to come

When the master rocker takes to planet earth  
We're gonna rock  
No more need for crying, no more need for fear  
Cos we'll be free at last  
No one really has they key that's gonna set us free  
Except the one  
Take a look around you and see it for yourself  
This world can never last  
It's fading fast  
Gone so fast

Come and party with the master rock  
Black or white, even young and old  
Cos his kingdom will last forever  
Let him into your heart and soul  
Drop the weight of the world beside you  
Let your troubles rest in their track  
It's your last chance to find direction  
Cos there won't be no turning back  
To a world that has no solution  
For the problems that's brought about  
So much fighting and evolution  
[?] no way out

When the master rocker takes to planet earth  
We're gonna rock  
No more need for crying, no more need for fear  
Cos we'll be free at last  
No one really has they key that's gonna set us free  
Except the one  
Take a look around you and see it for yourself  
This world will never last  
It's fading fast  
Gone so fast

When the master rocker takes his plane to earth  
We're gonna rock (rock children, sweet children)  
No more need for crying, no more need for fear  
We'll be free at last  
No one really has they key that's gonna set us free  
Except the one  
Take a look around you and see it for yourself  
This world could never last  
It's fading so fast

Come and party with the master rock  
Black or white, even young and old  
Cos his kingdom will last forever  
Let him into your heart and soul  
Come and party with the master rock  
Black or white, even...
