

Work It Out

Shalamar

Lets work it out, work it out, hold on
It's never, never too late
Lets work it out, work it out, hold on
Don't let this feeling get away

Giving up you seem to be
And that is something that's been bothering me
(Let's talk it out, that's what we're about)
If it means I'll take the blame
So our love will always stay the same
(I'll be more than glad, can't lose what we have)
Let's take the good with the bad
Like fire in the cold
Let's get it out of our system
Don't let it take control

Lets work it out, work it out, hold on
It's never, never too late
Lets work it out, work it out, hold on
Don't let this feeling get away

With the sun there comes the rain
And with love there's got to be some pain
(Don't ask me why, it's part of our lives)
Just as long as we are strong
And don't let others rule whats right or wrong
(We will survive, just take it in stride)
Cause when you walk away
From a love that's deep within your heart
You'll never live it down
It'll tear you apart

Lets work it out, work it out, hold on
It's never, never too late
Lets work it out, work it out, hold on
Don't let this feeling get away
