

## Corners

Shallou

You're terrified when you try to realign  
When something ain't right

It's only from the fighting for my life  
In the corners of my mind

We learn and grow, what we took down from the mountain  
And now I know, when the fire is out to try  
And find the light in the corners of my mind

Don't want to waste your time no more

I could only try  
For so long  
Can we let this go

We're still alive  
And we crawl back to the light  
The future's bright  
If it all keeps up  
And I can win the fight in the corners of my mind

Were tossed and worn  
As the currents speeding up  
Today I know times running out  
To stop living my life in the corners of my mind

Don't want to waste your time no more

I could only try  
For so long  
Can we let this go

I could only try  
For so long  
Can we let this go

I could only try  
For so long  
Can we let this go

I could only try  
For so long  
Can we let this go
