

No One Wins

Shallow Side

I think a look in the mirrors what I fear most
Reflecting all of the sickness undiagnosed
A parasite that's made me it's host
And maybe they don't make a cure for me

Maybe they don't make a cure for me

I keep on searching for happiness but it's just not happening
I tell myself I'll figure it out
I play pretend with my halo
But I'm not ok though
And in the end no one wins

I Feel like I'm so contagious and losing control
Reading words from the pages my father wrote
Falling further away hope
And maybe there just ain't no cure for me

I keep on searching for happiness but it's just not happening
I tell myself I'll figure it out
I play pretend with my halo
But I'm not ok though
And in the end no one wins

I knew I'd be on my own
Lost and all alone
Hoping for my chance
But In the end no one wins

Maybe they don't make a cure for me

I keep on searching for happiness but it's just not happening
I tell myself I'll figure it out
I play pretend with my halo
But I'm not ok though
And in the end no one wins
No one wins
No one wins
No one wins
