

Over

Shallow Side

Lookin at a shadow
Are you even there
I thought I knew ya
But I guess I didn't know you very well
Staring atcha phone livin in your own world don't you know I'm here?
Turnin back the clock cause I never knew it stopped
Is it even fair?
I can't believe it's over

I'm done holding onto
A world I don't belong too
Letting go to save you while I'm saving myself
I'm done holding onto
A world I don't belong too
Everything we've been through made us weaker than stronger
I just want it to be over

I wanted to need it when I found out you could fit in my mind
Caught ya pourin poison
You're the source and
We can never make up the time
I can't believe it's over

I'm done holding onto
A world I don't belong too
Letting go to save you while I'm saving myself
I'm done holding onto
A world I don't belong too
Everything we've been through made us weaker than stronger
I just want it to be over

You never should have pushed me so far over the edge
Cause now I can't look at you no second chances
You did me wrong the right way
Never gonna do it again

I'm done holding onto
A world I don't belong too
Letting go to save you while I'm saving myself
I'm done holding onto
A world I don't belong too
Everything we've been through made us weaker than stronger
I just want it to be over
