

## Cold Brew

Shamir

When I'm trying to sleep, my trauma visits me  
And reminds me it's all that I've got  
And I know it's rare to go on without fear  
Especially when all you're scared of is yourself

When my head is clear, the past inches near  
Along with everything I wanna leave behind  
So it's cold brew and ginger beer  
To get rid of these nightmares  
That's made me the void I know I am  
Fall in me and never land  
Fall in me and never land

My whole goal is to make everyone I know  
Feel the wrath past lives made my fate  
And the fog in my eyes, much to my surprise  
Keeps me going in the midst of hate

When my head is clear, the past inches near  
Along with everything I wanna leave behind  
So it's cold brew and ginger beer  
To get rid of these nightmares  
That's made me the void I know I am  
Fall in me and never land  
Fall in me and never land  
Fall in me and never land  
Fall in me and never land

When my head is clear, the past inches near  
Along with everything I wanna leave behind  
So it's cold brew and ginger beer  
To get rid of these nightmares  
That's made me the void I know I am  
Fall in me and never land  
Fall in me and never land  
Fall in me and never land  
Fall in me and never land
