

# Could You Would You Should You

Shaun Baker

If you could be king  
Of all you survey  
Only just for one day

Would it be good if you knew that you'd could?  
Change your world for better

We all tend to dream  
What wonders we have seen

We should take care of the things that are good  
Don't you think now is the time that you should  
Could you, would you, should you  
Be caring  
Could you, would you, should you

The world needs you now and you need it too  
Whichever whatever be good and be true  
Could you, would you, should you (repeat)

Making a change you'd know that we could  
Every day we have the power  
Making a difference is all up to us  
Change a world forever  
And what would we do  
For better or worse we choose

We should take care of the things that are good  
Don't you think now is the time that you should  
Could you, would you, should you  
Be caring  
Could you, would you, should you

The world needs you now and you need it too  
Whichever whatever be good and be true  
Could you, would you, should you (repeat)
