

Dream

Shaun

What a feeling sailing the stars
Take a look at this big world
Living on the edge then we fall fall fall in love
We can live forever young
What it means to make it this far
It means we are just who we are
Touring the galaxies going over and over
We're taking off with distant hearts

What makes me free is together
Bring to life the thoughts inside your mind
Is what makes us free together
Holding hands and standing side by side

I hear the melody from a far
And I'm loving every note
Dancing to your song I'm forever a dreamer
I can live forever young

I'm sick and tired of all of these problems
We can leave them where they are
The ups and downs in life's like a roller-coaster
With a smile I'll take it all

We can be a part of this journey to the sun when it comes up
We were meant to be there's nothing but love from the start

What makes me free is together
Bring to life the thoughts inside your mind
Is what makes us free together
Holding hands and standing side by side

Holding hands and standing side by side

What makes me free...
Is what makes us free...
Holding hands and standing side by side
