

The Little Things

Shawn Austin

It happens every now and then
Sitting at this red light
All the years I took a left
But now I'm turning right

And every time I wear that t-shirt
Every time my phone lights up
I swear your right back on my mind, girl
These days it don't take much

It's the little things that get me thinking about you
Wish I didn't but damnit I do
I never thought it'd be this hard
But even when you ain't baby, there you are
And it's a big deal when your in love
And then you break up
Get through the heartache part
And then just when you think you're fine
You still find a little pain
In the little things
It's all in the little things

It ain't seeing you out girl
Or running into your mom
If you wanna tear me up
Then turn up
Our first slow dance song

It's the little things that get me thinking about you
Wish I didn't but damnit I do
I never thought it'd be this hard
But even when you ain't baby, there you are
And it's a big deal when your in love
And then you break up
Get through the heartache part
And then just when you think you're fine
You still find a little pain
In all the little things
Yeah, it's all in the little things

And every time I wear that t-shirt
It just cuts me that much deeper, yeah

It's the little things that get me thinking about you
Wish I didn't but damnit I do
I never thought it'd be this hard
But even when you ain't baby, there you are
And it's a big deal when your in love
And then you break up
Get through the heartache part
And then just when you think you're fine
You still find a little pain
In the little things
Yeah, yeah, it's all in the little things

It happens every now and then
Sitting at this red light

All the years I took a left
But now I'm turning right
