

You're my muse
You're my dream
My abuse, my release
You're my lights
You're my fame
I never wanna let you fade

I can see the band now
Hear the fans chant out
La, la, la, la
I just love the way your body moves
I don't need no fantasy but you

Make me feel like a rockstar
Burning up the spotlight
Young hearts, living like we're making love
Like we're make love
You make wanna crash cars
Kiss like we're smashing guitars
Living like we're on the run
Like we're on the run

I'm the heat in your lungs
I'm the sweat on your tongue
Every breath, every drop
I don't ever wanna make it stop

I can see the stage
I hear the people rage like
La, la, la, la

I feel like a rockstar
Burning up the spotlight
Young hearts, living like we're making love
Like we're make love
You make wanna crash cars
Kiss like we're smashing guitars
Living like we're on the run
Like we're on the run

I just love the way your body moves
The way you move

I feel like a rockstar
Burning up the spotlight
Young hearts, living like we're making love
Like we're make love
You make wanna crash cars
Kiss like we're smashing guitars
Living like we're on the run
Like we're on the run
