

Along Our Way

Shawn James

We strolled on through the woods to find our way,
Directionless not knowing where to stay.
Hoping to find a reason so divine,
But it never came.

So we walked and walked and walked along our way.
And we walked and walked and walked along our way.

I dreamt one night of stars, of Mercury and Mars,
And how they all hang in space.
And in this dream I soared, I flew beyond the doors,
Once locked but now open forevermore.

And I flew and flew and flew along my way,
And I flew and flew and flew along my way.

So let me say once more of how the choice is yours,
And all that you desire can be attained.
But I hope that you don't find, your desires were a foolish kind.
Such a waste of the precious time we have.

And you'll walk and walk and walk along your way,
And you'll walk and walk and walk along your way.
