

# Pendulum Swing

Shawn James

Gotta get out of this town  
Been feeling that way ever since my feet touched this cursed ground  
I made it so I couldn't even stand  
With the help of this bottle in my hand

I stumbled around like a drunken fool  
Too blind to see that I was just being used like a throwaway tool  
In those hard times there was pain  
But I found that a hard lesson learned is wisdom gained

Cause though I may fall down with the sun  
You better know that I'm not done  
Cause I'll rise up with the morning light  
Just because I fall, it don't mean I've lost it all  
It's all apart of the pendulum swing

Well it might be you're down on your luck  
Fallen on hard times, maybe given up  
She did it thousand times before  
You shouldn't worry, there are such great things in store

Cause though we may fall down with the sun  
You better know that we're not done  
Cause we'll rise up with the morning light  
Just because we fall, it don't mean we've lost it all  
It's all apart of the pendulum swing  
It's all apart of the pendulum swing  
It's all apart of the pendulum swing
