

# The Coldest Night of the Year

She & Him

Baby baby it's late and you'd better go  
It's after three  
Come on, please have a heart, just look at that snow  
Take pity on me

I can hear that north wind blowing  
And the fire is oh so warm  
Well I know you should be going  
But how can I send you out in that storm

Baby it's cold out there, and it's getting colder  
Baby it's cold out there, getting colder  
Matter of fact better cuddle up here  
It's the coldest night of the year

Baby baby I know if you wanted to  
You'd brave the snow  
But I haven't been well I might catch the flu  
Or god only knows

Let's snuggle close together  
While the whole world turns to ice  
Just the victims of the weather  
Sending you home now just wouldn't be nice

Baby it's cold out there, and it's getting colder  
Baby it's cold out there, getting colder  
Matter of fact better cuddle up here  
It's the coldest night of the year

Ok? Why not?

Baby it's cold out there, and it's getting colder  
Baby it's cold out there, getting colder  
Matter of fact better cuddle up here  
It's the coldest night  
It's the coldest night  
It's the coldest night of the year
