

Mantra

Shelter

Earth can be a lonely place
Blank stares on the people's face
I contemplate their pointless chase
That traps me and my friends

Is this the place where I belong?
Where did we go wrong?
Will it last real long?
Are you too singing this song?

Sometimes I feel it
Sometimes I feel all so alone
And yes yes I must confess
I feel so far from home
Mantra take me home I trust you
Mantra take me home
Take me to the place where I belong

Life's a puzzle the thoughtful solve
But most choose not to get involved
Because of this we don't evolve
Just look around my friend

And life's meaning can be hard to grasp
All that's certain is it won't last
We're all spirits looking for transcendence
Oh mantra grant me that independence
