

Room to Breathe

Shelter

My own mind, can't go on noddin', something's wrong,
I must stand up, if there's a problem excavate it before infection
and we're out of luck, no, I don't mind making enemies,
they become who they wanna be, I won't be scared to disagree,
my heart and mind direct me,
room to breathe and to see anomalies in front of me,
opinions come like some disease, it's my life for me to live
Room to breathe and to see we're different people totally
and I'm not scared to disagree but it's my life for me to live
I don't boast many good qualities, my faults are many,
it's easy to see, I smile inside cause I walked my own path
despite the insults heaped upon me, no, I don't mind making enemies,
they become who they wanna be, I won't be scared to disagree,
my heart and mind direct me,
room to breathe and to see anomalies in front of me,
opinions come like some disease, it's my life for me to live
Room to breathe and to see we're different people totally
and I'm not scared to disagree but it's my life for me to live

We march in line
Step in time, room to breathe, use your mind
Or you're left behind, room to breathe

And I know that they will find peace of mind if I go on,
won't be tired, please, so you ask but me, my own mind,
can't go on noddin', something's wrong, I must stand up,
if there's a problem excavate it before infection and we're out
of luck,
no, I don't mind making enemies, they become who they wanna be,
I won't be scared to disagree, my heart and mind direct me,
room to breathe and to see anomalies in front of me,
opinions come like some disease, it's my life for me to live
Room to breath and to see we're different people totally
and I'm not scared to disagree but it's my life for me to live
