

Noise

Shenandoah

I can hear those trucks on the highway tonight
I can hear those kids down the block playing ball
I can hear the drone of my boss in my head
Saying "This weekend I need you on call"

The volume's up
The pressure's on
The phone is buzzing
You're the only reason
That I don't go crazy

Cause when we kiss the world outside is gone
And whatever lonely there is moves on
My heart doesn't have any choice
When I hear my name on your voice
Everything else
Everything else
Is just noise

Your eyes cut through every distraction
Through the rage of the machines and the roar of the engines
This rock keeps turning, this city don't sleep
You're my secret shelter when I can't find peace

The way you touch
The way you whisper
Way you're loving
How it lingers
You can make it all go away

Cause when we kiss the world outside is gone
And whatever lonely there is moves on
My heart doesn't have any choice
When I hear my name on your voice
Everything else
Everything else
Is just noise

Everything else is just noise
If it isn't you it's noise

Cause when we kiss the world outside is gone
And whatever lonely there is moves on
My heart doesn't have any choice
When I hear my name on your voice
Everything else
Is just noise
Is just noise
Everything else
Is just noise
Is just noise
