

Daylight

Sheppard

Pressure mounting
Heartbeat pounding
I start counting
All the mountains I still have to climb
And it keeps me up all night

The second hand is in slow motion
Information overloaded
Wide awake and wired
But I've never been so tired

When all of my stars are broken
All of the dark starts closing
In on my heart, you open up
My sky sky sky sky sky

You hit me like daylight
Making me open my eyes
Your love is like every single colour magnified

Some-some-something like magic
Changing my energy flow
Whenever the world around me starts to lose its glow
You light up like a light bulb

Wake up slow, slept in my clothes
My eyelids feel like they're still closed
I've wasted so much time
But you pull back the blinds

Your heaven
Your sun shine electric pop
All I ever needed, full stop

When all of my stars are broken
All of the dark starts closing
In on my heart, you open up
My sky sky sky sky sky

You hit me like daylight
You're making me open my eyes
Your love is like every single colour magnified

Some-some-something like magic
Changing my energy flow
Whenever the world around me starts to lose its glow
You light up like a light bulb

You turn me all the way up
Yeah you turn me all the way up
And when my world starts to go cold
You light up like a light bulb

You turn me all the way up
Yeah you turn me all the way up
And when my world starts to go cold

You hit me like daylight
You're making me open my eyes
Your love is like every single colour magnified (colour magnified)

Some-some-something like magic
Changing my energy flow
Whenever the world around me starts to lose its glow
You light up like a light bulb

Turn me all the way up
Turn me all the way up
Turn me all the way up
Way up, way up

Turn me all the way up
Turn me all the way up
Turn me all the way up
Way up, way up
